Attorney Docket No.: 2003-008

AMENDMENT TO THE SPECIFICATION

Please amend paragraph [0025] as follows:

"[0025] As indicated above, the adapter or insert device of this embodiment includes two basic components, a barrel insert 20 which includes a 12 gauge barrel portion 22 and is breech inserted, which barrel 20 extends through and beyond both ends of the host barrel, and a barrel cap 24 which includes the threading indicated at 24a that is adapted to be threaded onto corresponding threading 20a on barrel insert 20. The barrel cap 24 includes a flange and a hollow circumferential step on one end to enable the cap to insert into the host grenade launcher barrel 12 and secure the tapered distal end 28 of barrel insert 20 inside the host barrel."
